

Grenada

February 22 – 29, 2020

A three-island nation located in the Eastern Caribbean, Grenada has approximately 100,000 inhabitants and is the most southern of the Windward Islands. The abundant and warm waters have often served as an attraction to the island as has its abundant nutmeg crop, which gave Grenada

its nickname, the Spice Island.

Renowned as the "Shipwreck Capital of the Caribbean" wrecks litter Grenada's seascape, both naturally lost and purposely-sunk. You could easily dive just wrecks on Grenada, but you would miss reefs, walls and the underwater sculpture parks that are prolific marine ecosystems.

A variety of hard and soft corals, sponges and fans cover most of the island's dive sites. Surrounding the wrecks, it is common to see beautiful and bright orange cup coral. On deeper dives and on many of the drift dives, you have a good chance of spotting stingrays, barracuda, sea turtles, eagle rays and nurse sharks. During reef dives, purple Creole wrasse

populate the waters along with octopus, moray eels and lizardfish. In the shallows, you might find a frogfish or an elusive black seahorse lurking about.
